- (A) a maximum...studies
- (B) a rational...awards
- (C) an increasing...athletics
- (D) an exceptional...professors

Reading Passage

And now to the particular physics of surf-riding. Get out on a flat board, six feet long, two feet wide, and roughly oval in shape. Lie down upon it like a small boy on a coaster and paddle with your hands out to deep water, where the waves begin to crest. Lie out there quietly on the board. Sea after sea breaks before, behind, and under and over you, and rushes in to shore, leaving you behind. When a wave crests, it gets steeper. Imagine yourself, on your board, on the face of that steep slope. If it stood still, you would slide down just as a boy slides down a hill on his coaster. "But," you object, "the wave doesn't stand still." Very true, but the water composing the wave stands still, and there you have the secret. If ever you start sliding down the face of that wave, you'll keep on sliding and you'll never reach the bottom. Please don't laugh.

The author compares surfing to

- A. an ever-increasing hole forming in the water.
- B. a chemistry experiment gone wrong.
- C. a boy sledding down a hill on a coaster.
- D. a transformation of time and space

General Knowledge

When Musharraf overthrew the government of Nawaz Sharif what designation did he take?

- A. Dictator
- B. Consul
- C. Prime Minister
- D. Chief Executive

General Maths
